INDEX BY AUTHORS

Bacon, H. M.
High school mathematics in the university. XXXIII, January 1940, 14–17

Bell, E. T.
Buddha's advice to students and teachers of mathematics. XXXIII, October 1940, 252–261

Bernardo, James V.
A helpful technique in teaching solid geometry. XXXIII, January 1940, 39–40

Betz, William
The Present Situation in Secondary Mathematics, with Particular Reference to the New National Reports on the Place of Mathematics in Education. XXXIII, December 1940, 339–360

Bond, E. A.
Improving instruction in arithmetic. XXXIII, May 1940, 195–209

Breslich, E. R.
Presenting the Report of the Joint Commission to the National Council of Teachers of Mathematics. XXXIII, April 1940, 147–149

Bruns Walter J.
The introduction of negative numbers. XXXIII, October 1940, 262–269

Christofferson, H. C.
Looking forward. XXXIII, April 1940, 180–181

Daniells, Marian E.
The trisector of Amadori. XXXIII, February 1940, 80–81

Douglass, Harl R.
Two Important Deliberative Reports Concerned with Mathematics in the Schools. XXXIII, December 1940, 361–366

Drake, Richard, and Donovan Johnson
Vitalizing geometry with visual aids. XXXIII February 1940, 56–59

Ely, E. E.
The value of simplification. XXXIII, October 1940, 276–277

Fellroth, Anna L.
Spring thoughts. XXXIII, March 1940, 138

Foster, LeBaron R.
Nine out of ten like consumer credit problems. XXXIII, February 1940, 51–55

Gottschalk, Winston M.
Analytic geometry and trigonometry in second year algebra. XXXIII, February 1940, 82–83

Gunderson, Agnes G.
Number concepts held by seven-year-olds. XXXIII, January 1940, 18–24

Hartung, Maurice L.
Some Suggestions to Readers of Two Recent Reports on the Mathematics Curriculum. XXXIII, December 1940, 371–373

Havighurst, Robert J.
Does Mathematics Belong in General Secondary Education? XXXIII, December 1940, 367–369

Hedrick, E. R.
The contribution of mathematics to general education. January 1940, 3–9

Henderson, Kenneth B.
The lessons non-Euclidean geometry can teach. XXXIII, February 1940, 73–79

Hutchins, Robert M.
Reminiscences. XXXIII, October 1940, 243–251

Johnson, Donovan. See Drake, Richard

Katra, A. E.
Alligation alternate for the algebra course. XXXIII, May 1940, 225–228

Keller, M. W., Shreve, D. R. and Remmers, H. H.
A Report on a diagnostic Testing Program at Purdue University. The Number Technique ability of students in beginning courses in mathematics. XXXIII, November 1940, 321–324
Teaching the subtraction of signed numbers. XXXIII, November 1940, 328

Kruglak, Haym
A simple blackboard ellipsograph. XXXIII, April 1940, 179

Lane, Ruth
The use of graded originals in plane geometry. XXXIII, November, 1940, 291–300

Lazar, Nathan
In other periodicals. XXXIII, January, 44–45; February, 88–89; March, 137–138; April, 183–184; May, 231–232; October, 283–284; November, 329–330; December, 376–377

Leary, Arthur F.
Analytic geometry in the high school. XXXIII, February 1940, 60–68

Levy, Sophia H.
The coordination of the teaching of mathematics. XXXIII, May 1940, 216–220

Murray, Earl and Ritchie, Robert W.
Mathematics for the modern junior high school. XXXIII, November 1940, 311–320

Neal, Offa
Use of figures in solving problems in algebra and geometry. XXXIII, May 1940, 210–212

O'Quinn, Ralph
Status and trends of ability grouping in the state universities. XXXIII, May 1940, 213–215

Pickett, Hale
Functional thinking in geometry. XXXIII, February 1940, 69–72

Potter, Mary A.
What of the future? XXXIII, April 1940, 181–182
The Two Recent National Reports on Mathematics in General Education. XXXIII, December, 370

Purdy, C. R.
Crossword puzzle on percentage. XXXIII, March 1940, 135

Reeve, W. D.
Editorials. XXXIII, January, 43; March, 136; May, 229; October, 282; December, 374

Remmers, H. H. See Keller, M. W.

Ritchie, Robert W. See Murray, Earl

Schlauch, W. S.
The use of calculating machines in teaching arithmetic. XXXIII, January 1940, 35–38

Schreiber, Edwin W.
The twenty-first annual meeting of the National Council of Teachers of Mathematics. XXXIII, May 1940, 221–224
The sixth summer meeting of the National Council of Teachers of Mathematics. XXXIII, October 1940, 278–281

Schulte, Sister M. Leontius
Extra-curricular mathematical activities in secondary schools. XXXIII, January 1940, 32–34

Shreve, D. R. See Keller, M. W.

Smith, Rolland R.
Three major difficulties in the learning of demonstrative geometry. XXXIII, Part I, March 1940, 99–134; Part II, April 1940, 150–178
Sueltz, Ben A.
Recent trends in arithmetic. XXXIII, October 1940, 270–275
Sumner, Ruth G.
Shall we accept the two years of required academic mathematics as a right, a ritual, or a challenge? XXXIII, January 1940, 10–13
Welch, Harriet A.
Shall we defer the teaching of algebra to the tenth year? XXXIII, November 1940, 325–327
Wheeler, Lester R. and Wheeler, Viola D.
An experimental study in learning to read numerals. XXXIII, January 1940, 25–31
Wheeler, Viola D. See Wheeler, Lester R.
Yates, Robert C.
The story of the parallelogram. XXXIII, November 1940, 301–310

INDEX BY TITLES AND SUBJECTS

Alligation alternate for the algebra course. Katra, A. E. XXXIII, May 1940, 225–228
Algebra
Alligation alternate for the algebra course. Katra, A. E. XXXIII, May 1940, 225–228
Analytic geometry and trigonometry in second year algebra. Gottschalk, Winston M. XXXIII, February 1940, 82–83
Introduction of negative numbers. Bruns, Walter J. XXXIII, October 1940, 262–269
Shall we defer the teaching of algebra to the tenth year? Welch, Harriet A. XXXIII, November, 1940, 325
Teaching the subtraction of signed numbers. Katra, A. E. XXXIII, November 1940, 328
Use of figures in solving problems in algebra and geometry. Neal, Offa. XXXIII, May 1940, 210–212
Analytic geometry and trigonometry in second year algebra. Gottschalk, Winston M. XXXIII, February 1940, 82–83.
Analytic Geometry in the high school. Leary, Arthur F. XXXIII, February 1940, 60–68
Arithmetic
Crossword puzzle on percentage. Purdy, C. R. XXXIII, March 1940, 135
Experimental study in learning to read numerals. Wheeler, Lester R., and Wheeler, Viola D. XXXIII, January 1940, 25–31
Improving instruction in arithmetic. Bond, E. A. XXXIII, May 1940, 195–209
Nine out of ten like consumer credit problems. Foster, LeBaron R. XXXIII, February 1940, 51–55
Number concepts held by seven year olds. Gunderson, Agnes G. XXXIII, January 1940, 18–24
Recent trends in arithmetic. Sueltz, Ben A. XXXIII, October 1940, 270–275
Use of calculating machines in teaching arithmetic. Schlauch, W. S. XXXIII, January 1940, 35–38
Buddha's advice to students and teachers of mathematics. Bell, E. T. XXXIII, October 1940, 252–261
Contribution of mathematics to general education. Hedrick, E. R. XXXIII, January 1940, 3–9
Coordination of the teaching of mathematics. Levy, Sophia H. XXXIII, May 1940, 216–220
Crossword puzzle on percentage. Purdy, C. R. XXXIII, March 1940, 135
Does Mathematics Belong in General Secondary Education? Havighurst, Robert J. XXXIII, December 1940, 367–369
Editorials. Reeve, W. D. XXXIII, January, 43; March, 136; May, 229; October, 282; December, 374
Experimental study in learning to read numerals. Wheeler, Lester R. and Wheeler, Viola D. XXXIII, January 1940, 25–31
Extra-curricular mathematical activities in secondary schools. Schulte, Sister M. Leontius. XXXIII, January 1940, 32–34
Functional thinking in geometry. Pickett, Hale. XXXIII, February 1940, 69–72
Geometry
Analytic geometry in the high school. Leary, Arthur F. XXXIII, February 1940, 60–68
Functional thinking in geometry. Pickett, Hale. XXXIII, February 1940, 69–72
Helpful technique in teaching solid geometry. Bernardo, James V. XXXIII, January 1940, 39–40
Simple blackboard ellipsograph. Kruglak, Haym. XXXIII, April 1940, 179
The use of graded originals in plane geometry. Lane, Ruth. XXXIII, November 1940, 291
The story of the parallelogram. Yates, Robert C. XXXIII, November 1940, 301
Three major difficulties in the learning of demonstrative geometry. Smith, Rolland R. XXXIII, Part I, March 1940, 99–134; Part II, April 1940, 150–178
Trisector of Amadori. Daniells, Marian E. XXXIII, February 1940, 80–81
Vitalizing geometry with visual aids. Drake, Richard and Donovan Johnson. XXXIII, February 1940, 56–59
Helpful technique in teaching solid geometry. Bernardo, James V. XXXIII, January 1940, 39–40
High school mathematics in the university. Bacon, H. M. XXXIII, January 1940, 14–17
Improving instruction in arithmetic. Bond, E. A. XXXIII, May 1940, 195–209
In other periodicals. Lazar, Nathan. XXXIII, January, 44–45; February, 88–89; March, 137–138; April, 183–184; May, 231–232; October, 283–284; December, 374–376
Introduction of negative numbers. Bruns, Walter J. XXXIII, October 1940, 262–269
Lessons non-Euclidean geometry can teach. Henderson, Kenneth B. XXXIII, February 1940, 73–79
Looking Forward. Christofferson, H. C. XXXIII, April 1940, 147–149
Mathematics for the modern junior high school. Murray, Earl and Ritchie, Robert W. XXXIII, November 1940, 311–320

News Notes. XXXIII, February 1940, 90–92; March, 139–141; May, 236–238; October, 285–287
Nine out of ten like consumer credit problems. Foster, LeBaron R. XXXIII, February 1940, 51–55
Number concepts held by seven-year-olds. Gunderson, Agnes G. XXXIII, January 1940, 18–24
National Council of Teachers of Mathematics
Program twenty-first annual meeting. XXXIII, January 1940, 41; February 1940, 84–87
Twenty-first annual meeting of the National Council of Teachers of Mathematics. Schreiber, Edwin W. XXXIII, May 1940, 221–224
Summer meeting of the National Council. XXXIII, May 1940, 233–235
Sixth summer meeting of the National Council of Teachers of Mathematics. Schreiber, Edwin W. XXXIII, October 1940, 278–281
Presenting the report of the Joint Commission to the National Council of Teachers of Mathematics. Breslich, E. R. XXXIII, April 1940, 147–149
Recent trends in arithmetic. Sueltz, Ben A. XXXIII, October 1940, 270–275
Reminiscences. Hutchins, Robert M. XXXIII, October 1940, 243–251
Report on a diagnostic testing program at Purdue University. Keller, M. W., Shreve, D. R. and Remners, H. H. XXXIII, November 1940, 321–324
Shall we accept the two years of required academic mathematics as a right, a ritual, or a challenge? Sumner, Ruth G. XXXIII, January 1940, 10–13
Shall we defer the teaching of algebra to the tenth year? Welch, Harriet A. XXXIII, November 1940, 325–327
Simple blackboard ellipsograph. Kruglak, Haym. XXXIII, April 1940, 179
Sixth summer meeting of the National Council of Teachers of Mathematics. Schreiber, Edwin W. XXXIII, October 1940, 278–281
Some Suggestions to Readers of Two Recent Reports on the Mathematics Curriculum. Hartung, Maurice L. XXXIII, December 1940, 371–373
Spring thoughts. Fellroth, Anna L. XXXIII, March 1940, 138
Status and trends of ability grouping in the state universities. O'Quinn, Ralph. XXXIII, May 1940, 213–215
The Present Situation in Secondary Mathematics, with Particular Reference to the New National Reports on the Place of Mathematics in Education. Betz, William. XXXIII, December 1940, 339–360
The Two Recent National Reports on Mathematics in General Education. Potter, Mary A. XXXIII, December 1940, 370
Story of the parallelogram. Yates Robert C. XXXIII, November 1940, 301–310
Teaching the subtraction of signed numbers. Katra, A. E. XXXIII, November 1940, 328
Three major difficulties in the learning of demonstrative geometry. Smith, Rolland R. XXXIII, Part I, March 1940, 99–134; Part II, April 1940, 150–178
Trisector of Amadori. Daniells, Marian E. XXXIII, February 1940, 80–81
Twenty-first annual meeting of the National Council of Teachers of Mathematics. Schreiber, Edwin W. XXXIII, October 1940, 278–281
Two Important Deliberative Reports Concerned with Mathematics in the Schools. Douglass, Harl R. XXXIII, December 1940, 361–366
